SMOOTH SAILING, LETTY!

THE first two issues of *Oceanography Magazine* were published with the help of Leticia Benning, whose name appeared on the masthead under the title Administrative Assistant.

Letty expertly guided us through the awkward early steps in establishing the various accounts and procedures needed to organize and publish the first editions of the magazine. Her experience and training in management and accounting helped us avoid some of the impending pitfalls. It is now painfully obvious just how naïve we all were (and still are, to a considerable extent) when we decided to publish a magazine, with only a vague idea of what was involved in such a venture.

We just jumped in, hoping to learn how to swim. We are still thrashing about a bit, but with somewhat less desperation and prospects of at least a serviceable backstroke. Letty helped us through the early stages of "creaks and groans," which I promised would surface, and she got us on the road to sensible organization, a skill at which I am notoriously deficient.

Letty has recently moved on to another job, one that will allow her to further develop and apply her considerable talents within Texas A&M University. We at the magazine wish her, in the finest marine tradition, smooth sailing. □ —Dave Brooks
