CORRECTIONS

Please send corrections to magazine@tos.org. Corrections will be printed in the next issue of *Oceanography*.

ON THE COVER

The cover photo was taken from a boat in the early morning hours of December 12, 2011, soon after Kilauea erupted again after an almost 10-month hiatus. Lava began streaming into the ocean two days before this photo was taken. Trying to take a good shot from a small boat, rocking and rolling on high seas close to scorching lava, was a dangerous but rewarding experience for photographer Ilya Raskin of Rutgers University. For more on Hawaii's volcanoes, please see article "Pele's Tears: 'Lava Fingerprinting' Reveals Hawaii Volcanoes' Geochemistry" by Cheryl Lyn Dybas on page 10.

Introducing Full Electronic Versions of *Oceanography*

Recognizing that more people want the convenience of reading journals on their laptops or other portable devices, with the September 2012 issue of *Oceanography*, The Oceanography Society launched a full electronic version as an additional membership benefit. TOS members can now view new issues of the magazine through Qmags (<http://www.qmags.com>) either in a Web browser or as a downloadable PDF. Nonmembers can purchase the full electronic versions of individual issues of *Oceanography* by going to <http://www.qmags.com/OCG>.

We anticipate that an iPad app for *Oceanography* will be available at the time we go to press with this December issue. Keep your eyes peeled for notification of this exciting new electronic product via a TOS NEWS email.

In addition to accessing the current issue of *Oceanography* through Qmags, back issues that you've previously downloaded are available on your "My Qmags" page. As a bonus, at the September launch, we made an electronic version of the June 2012 issue available in the issue archive as well. To read available *Oceanography* issues, you will need to log into "My Qmags" using the email address that TOS has on file for you and your password. If you have forgotten your password or somehow did not receive it, Qmags can send it to you. If the email address we have on file appears to be the problem (it is the one we use to notify you when a new electronic issue of *Oceanography* is available), please go to your TOS member login page to check your personal information. If your TOS login is also a mystery, please contact Jenny Ramarui (jenny@tos.org) for that information.

Importantly, the paper version of *Oceanography* is not going away. However, if you want electronic access only, please let Jenny (jenny@tos.org) know. Note, too, that all *Oceanography* articles, organized by the issues in which they appear, will continue to be accessible to the public at <http://tos.org/oceanography/issues/archive.html> as downloadable PDFs. And it is still only on the *Oceanography* Web pages that you will find article DOIs, which have become such an important part of citing articles.

As with any new endeavor, there are bound to be growing pains. Please send me your comments on the electronic versions—good and bad—so that we can improve delivery.
